“Developing intelligent robotic systems for long-endurance real-world autonomy.”

About Me

I am a final-year B.Eng. student in Automation and Informatics at Vietnam National University, Hanoi, with a strong research interest in robotics, control, autonomous systems, and wireless power transfer. My current research focuses on developing long-endurance autonomous robotic systems, particularly autonomous underwater vehicles (AUVs), through intelligent control, mechanical design, and wireless power transfer (UWPT).

Education

Vietnam National University, Hanoi – International School

Hanoi, Vietnam

B.Eng. in Automation and Informatics

Sep. 2021 – Dec. 2026

- GPA: 3.71/4.00; ranked in the top 4% of the cohort.
- Relevant coursework: Control Systems, Modeling and Simulation, Microprocessors and Microcontrollers, Robotics, Embedded Systems, and Automation Engineering.
- Research focus: robotics, intelligent control, autonomous systems, wireless power transfer, and AI-enabled engineering systems.

Research Experience

Water & Energy Research Lab, School of EEE, Nanyang Technological University

Singapore

Research Fellow

Feb. 2026 – Present

- Project: Advanced 3D Wireless Power Transfer System for Autonomous Underwater Vehicles.
- Investigating relay-coil-enhanced spatial wireless power transfer for AUV charging, with emphasis on power transfer efficiency, coil configuration, and system-level integration.
- Optimizing the mechanical design of AUVs to support underwater operation, wireless charging integration, and long-endurance autonomy.
- Exploring underwater communication between the transmitter and receiver sides of the system for reliable AUV charging coordination.

AISC Lab, AIM-HI Institute, National Chung Cheng University

Chiayi, Taiwan

Research Intern

May 2025 – Jul. 2025

- Project: Smart Sensing Technology for Smart Manufacturing.
- Developed a data-driven approach to estimate dynamic cutting forces in milling using 12 large-scale datasets.
- Combined nonlinear system analysis with sparse identification methods to model and predict cutting force behavior.
- Achieved moderate prediction accuracy with R^2 between 0.5 and 0.6 compared with ground-truth measurements.

AISC Lab, AIM-HI Institute, National Chung Cheng University

Remote

Remote Research Student

Aug. 2025 – Present

- Project: Prediction of cutting force model using AI and data-driven methods.
- Implementing machine learning models, including Random Forest and XGBoost, using 27 large-scale datasets collected through a Taguchi-designed experiment.
- Developing data-driven modeling pipelines for feature engineering, model training, and cutting force prediction in machining processes.

Intelligent Control and Artificial Intelligence Laboratory, VNUIS

Hanoi, Vietnam

Student Researcher

Sep. 2022 – Present

- Project: Adaptive Fuzzy Logic in Backstepping Control for 3-DOF Parallel Robot.
- Designed the mechanical model and physical prototype of a 3-DOF delta robot, and implemented adaptive fuzzy backstepping control for robust trajectory tracking under uncertainties.
- Reduced joint trajectory deviations to less than 0.15 rad, with stability reached in 0.15–0.2 s in simulation studies.
- Project: Detection of Personal Protective Equipment in Construction Sites.
- Built a dataset of 2,632 construction-site images across five classes and trained YOLOv5s with multiple activation functions for PPE detection.

Teaching Experience

Faculty of Engineering and Technology, VNUIS

Teaching Assistant

Hanoi, Vietnam

Sep. 2023 – Dec. 2024

- Course: Modeling and Simulation of Control Systems.
- Assisted 30 students across 7 laboratory sessions on MATLAB/Simulink for robotics, mechatronics, and process control applications.
- Supported the preparation of laboratory manuals, tutorial exercises, and simulation-based learning materials.
- Course: Microprocessors and Microcontrollers.
- Mentored 30 students through 15 laboratory sessions on Embedded C, Arduino, STM32, Keil uVision, Arduino IDE, and STM32CubeIDE.

Hung STEM Robotics Lab

Hanoi, Vietnam

Robotics Teaching Collaborator

Jul. 2022 – Dec. 2022

- Mentored students for the World Robot Olympiad 2022 Vietnam and supported the development of LEGO-based robotics modules.
- Delivered hands-on STEM robotics sessions using LEGO NXT for students at Grammar Newton International Bilingual School, Hanoi.

Working Experience

ETEK Automation Solutions JSC

Hanoi, Vietnam

Engineering Intern

Mar. 2025 – May 2025

- Project: AGV-based Virtual Simulation for Automated Warehouse Logistics – VINFAST Hai Phong.
- Sketched AGV/AMR traffic intersections using AutoCAD and simulated warehouse logistics operations using Visual Components Premium 4.6.
- Monitored AGV/AMR behavior, identified simulation errors, and supported troubleshooting of automated logistics workflows.

Vietnam E-Commerce and Digital Economy Agency, Ministry of Industry and Trade

Hanoi, Vietnam

Technical Collaborator

Jul. 2023 – Sep. 2023

- Project: Consultancy Support and Sales Policy Development for E-Commerce Website.
- Coordinated with SMEs across Dak Nong and An Giang provinces to support e-commerce platform development.
- Assisted in website design, content management, and preparation of technical manual documents.

International Programs & Exchange Experience

NTU Singapore Global Connect Fellowship

Singapore

Research Fellowship

Feb. 2026 – Mar. 2026

- Selected as one of 39 young scholars worldwide for a fully funded research fellowship at Nanyang Technological University.
- Conducted research on advanced 3D wireless power transfer systems for autonomous underwater vehicles.
- Received the Most Popular Poster Award at the final research poster presentation.

DiscoverNUS, National University of Singapore

Singapore

Academic Exchange

Aug. 2025 – Dec. 2025

- Selected as one of 8 excellent VNU students for a fully funded exchange program at NUS.
- Expanded academic exposure to international engineering education, research culture, and interdisciplinary learning.

Taiwan Experience Education Program, National Chung Cheng University

Taiwan

Research Internship

May 2025 – Jul. 2025

- Selected as one of 28 global students for a fully funded research internship supported by the Ministry of Education, Taiwan.
- Worked on smart sensing technology and data-driven modeling for smart manufacturing.

ASEAN in Today's World, Kyushu University

Indonesia

International Study Program

Feb. 2025

- Selected as one of 4 VNU representatives to participate in the ASEAN-focused international study program.

Temasek Foundation SCALE

Vietnam & Singapore

Leadership Exchange Program

Feb. 2024

- Selected as one of 20 VNU representatives for a fully funded leadership and community action exchange program.

Publications

Adaptive Fuzzy Logic in Backstepping Control for 3-DOF Parallel Robot

International Conference on Advances in Information and Communication Technology, Springer

2024

- Long Nguyen Khac et al.
- Proposed an adaptive fuzzy logic control system integrated with backstepping control for a 3-DOF delta robot.
- Validated robust trajectory tracking performance under uncertainties through MATLAB/Simulink simulation.

DOI:10.1007/978-3-031-80943-9_57

YOLOv5s Model with Applied Activation Functions for Personal Protective

Equipment Detection in Construction Sites

National Conference on Smart Technology Applications in Industry 4.0, Smart City, and Sustainability

2023

- Long Nguyen Khac et al.
- Developed a deep learning-based PPE detection system using YOLOv5s and a dataset of 2,632 construction-site images.
- Compared six activation functions and achieved the best result with SiLU: Precision 84.8%, Recall 80.2%, mAP@0.5 83.9%, and mAP@0.95 43.6%.

May 10, 2026

Long Nguyen Khac · Curriculum Vitae

2

Honors & Awards

2026	Fully Funded Scholarship , NUS Enterprise Summer Programme in Entrepreneurship, NUS ASEAN SPARK Fellowship	<i>Singapore</i>
2026	Exchange Scholarship , Kyushu University Spring-Semester Exchange Scholarship, Department of Mechanical Engineering	<i>Japan</i>
2026	Most Popular Poster Award , NTU Singapore Global Connect Fellowship Final Research Poster Presentation	<i>Singapore</i>
2026	Research Fellowship , Selected as one of 39 young scholars worldwide for NTU Singapore Global Connect Fellowship	<i>Singapore</i>
2025	Fully Funded Scholarship , DiscoverNUS Scholarship, National University of Singapore	<i>Singapore</i>
2025	Research Internship Scholarship , Taiwan Experience Education Program, Ministry of Education	<i>Taiwan</i>
2025	International Program , ASEAN in Today's World, Kyushu University	<i>Indonesia</i>
2024	Scholarship , TOSHIBA Scholarship, TOSHIBA International Foundation	<i>Vietnam</i>
2024	Fully Funded Exchange Program , Temasek Foundation Specialist's Community Action & Leadership Exchange	<i>Vietnam & Singapore</i>
2022	Fighting Spirit Prize , South-East Asia Circuit and System Society Hackathon	<i>Vietnam</i>
2021–2025	Academic Scholarship , Six-semester recipient for excellent academic performance	<i>VNU</i>
